## Pneumatic Clipper

With manual two-hand operation for maximum safety

- Stationary and mobile clipper systems
- Clipper in Ex and Non - Ex versions
- Clip and cut in one work process
- Manual two-hand operation for operator safety
- Integration into existing packaging lines

### Function

The endless foil is prepared for the filling process. The filling process can get started subsequently. The filled endless foil is closed with two metal clips and automatically separated between the clips in the same operation.
