

_ Bag-Out System Compact equipped- with the Novi-Compact Liner

The Bag-Out System Compact was designed for simple, secure and closed entry and removal of bags, small containers, contaminated clothing and waste products. Installed in a cleanroom wall, a staff air lock, an isolator or a glove box, the snap closure with a hinged lid can be conveniently opened and closed by hand. For complete closed liner exchange, the liner holder is equipped with a proven Safe-Change-System. The Novi-Compact Liner is offered in a film length of up to 110 metres, depending upon the size.

Your benefits

- _ Deployable in cleanrooms (single or double-walled system), staff airlocks, isolators, glove boxes, etc.
- _ Completely closed inward and outward product transfers
- _ Bag-Out System, Novi-Compact Liner and closure device from one source
- _ Novi-Compact Liner up to 110 metres film length
- _ Simple and secure single-handed operation
- _ Completely closed liner exchange thanks to the proven Safe-Change-System.
